A Mother's Prayer

I had three little boys who lived at my house that God loaned out to me . You have grown up now and I'm as proud as I can be. One of those little boys has chosen to fight for all of us in a far away land. I know that someday we will all be free, but Lord if you're listening, please bring Pat back home to me. So for all you mothers near and far, the little boy that was loaned out to you, I pray God takes his hand and brings him home to you from that far away land. May the peace be with us until God takes them in his hands and leads them home from war in that far away land.

By Tressa Chrisman, mother of PFC Patrick Miller

Fireplace Safety Pointers

For those of you with fireplaces, please keep the following safety precautions in mind:

- Make sure the flue is open before starting the fire.
- Keep your screen in front of the fireplace closed to prevent hot embers from jumping out while fire is going.
- Use only dry, seasoned wood.
- Always use a grate (log holder).
- Use a small amount of paper or small pieces of wood to start the fire. If you twist the paper into a compact tube shape first, it will burn longer, giving the logs a good start.
- Don't use excessive amounts of paper to build roaring fires in the fireplace. And never use combustible liquids such as kerosene, lighter fluid, or gasoline to start a fire.
- Never leave a fire unattended.
- Never close the flue if hot ashes or embers are still burning.
- After ashes cool completely, place in metal container and discard in dumpsters.
- Remember to keep matches and lighters out of hands of children.

IMPORTANT! PLEASE READ!

From time to time we encounter sewer-related problems here at Southlake Village. Most of the time the problems are very minor, such as a stopped up toilet or a clogged sink, but sometimes they are major, affecting an entire building. But most, if not all, of these problems can be prevented by simply following a few reasonable guidelines.

- **Toilets:** The only things that should be flushed in a toilet is toilet paper and human waste. Never dispose of paper towels, rags, swabs, or feminine hygiene products (sanitary napkins and tampons) in your toilet.
- **Kitchen Sinks:** When using your disposal, be sure to run plenty of cold water before, during, and after disposing food products. This will ensure that all food items are fully ground up and cleared from the drain lines. And remember, never dispose of grease, potato peels, or rice in your disposal.
- **Bathroom Sinks & Tub:** Water is the only thing that should be ran in your sinks and tub.

If you find that your sink or tub is draining slow or your toilet isn't acting right, please call, 522-4855, so we may make repairs before it becomes a major problem. With your help we can avoid costly and messy problems!

Regarding the Laundry Machines.....Please do not put any clothes that are soiled with grease or tar into the washers or dryers. Doing so will damage the machines and soil other people's clothing. We recommend taking such items to a professional dry cleaner to be cleaned. The chemicals they use work much better than soap and detergent. And PLEASE DO NOT SMOKE in the laundry rooms. Thank you for your cooperation.
